Rachel de Jooede: Flat Nature / Surface Bodies – at Kunstfort bij Vijfhuizen

Kunstfort bij Vijfhuizen proudly presents Rachel de Jooede's *Flat Nature / Surface Bodies*, a comprehensive exhibition of new work – including five outdoor sculptures.

De Jooede was one of the first to combine sculptural objects and photographic prints with reference to internet aesthetics. The artist is known for her 'sculptural photography', for which she prints and cuts pictures of natural materials in organic forms.

Recently De Jooede developed new works in which only the sculptural frame is left. The flat objects in public space resonate with the omnipresence of image in our contemporary society, but also with the plane surroundings of the Kunstfort. The landscape becomes a 'bühne', in which De Jooede's images take the lead. But to what extent will nature let reduce itself to just a frame?
